

GEA CUEVAS

DOCUMENT CONTROL OFFICER

Batangas, Philippines • geamcuevas@gmail.com • +639505046753 • linkedin.com/in/geacuevas/

PROFESSIONAL SUMMARY

Detail-oriented professional with hands-on experience managing project documentation, quality records, and structured reporting across IT and research-driven projects. Skilled in maintaining accurate, up-to-date documentation systems, coordinating information across stakeholders, and ensuring records comply with established processes and standards. Certified in Lean Project Management, with a consistent record of organized, on-time, and audit-ready documentation.

EXPERIENCE

Quality Assurance Lead Intern **Feb 2026 – May 2026**

Center for Artificial Intelligence and Smart Technologies - Batangas State University

- Documented QA processes, defect logs, and testing outcomes in detailed reports shared with project leads and technical stakeholders after each deployment cycle.
- Coordinated QA workflows and record-keeping for an AI application project, managing test schedules, defect prioritization logs, and resolution timelines.
- Led a structured testing and documentation process that identified 40+ defects pre-deployment, maintaining accurate records that ensured projects shipped without critical quality failures.

Associate Project Manager for Research and Impact Intern **Jan 2025 – Jan 2026**

Tech Executive Labs I.T. Solutions

- Maintained project documentation and milestone records across 3 concurrent projects, flagging risks and keeping deliverables on schedule.
- Produced structured stakeholder reports from research and impact analysis, ensuring data and recommendations were accurately recorded and communicated.
- Coordinated documentation and information flow across 3 cross-functional teams spanning development, design, and research.

PROJECTS

SparStock: Integrated Resource Inventory Management System — Project Lead

- Maintained structured project documentation and status records across full SDLC delivery, completing the project on scope and schedule.
- Tracked and recorded 3 major milestones through sprint planning, retrospectives, and weekly status updates.

GeoSME: Web-Based Batangas Province SME GIS Mapping System — Project Lead

- Maintained project schedules, task records, and documentation across a 3-person team, ensuring all milestones were met on time.
- Facilitated stakeholder alignment sessions with academic and local government partners, keeping records tied to project scope and goals.

SKILLS

Documentation & Records: Document Control, Records Management, Master List Maintenance, Version Control, Report Writing, Process Documentation

Quality & Compliance: QA Documentation, Defect Tracking & Reporting, SDLC Documentation, Standards Compliance, Risk Identification

Core Strengths: Attention to Detail, Organizational Skills, Stakeholder Communication, Time Management, Cross-functional Collaboration

EDUCATION

BS Information Technology – Major in Service Management

Batangas State University TNEU Lipa Campus | Aug 2022 – Jul 2026

CERTIFICATIONS

- Lean Project Management – Yellow Belt, 2025 | Certificate No. 2001824
- Asana Workflow Specialist, 2025

GEA CUEVAS

INFORMATION TECHNOLOGY

Batangas, Philippines • geamcuevas@gmail.com • +639505046753 • linkedin.com/in/geacuevas/

PROFESSIONAL SUMMARY

Information Technology graduate with hands-on experience across the full project and system lifecycle — from development and QA testing to data-driven project delivery. Proven ability to support system quality, manage technical documentation, coordinate cross-functional teams, and deliver IT-driven projects (inventory management system, GIS mapping platform) on scope and schedule. Certified in Agile/Scrum and Lean Project Management, with strong adaptability across development, QA, and coordination functions within IT environments.

EXPERIENCE

Quality Assurance Lead Intern

Feb 2026 – May 2026

Center for Artificial Intelligence and Smart Technologies - Batangas State University

- Coordinated QA workflows in an AI application project, managing test scheduling, defect prioritization, and resolution timelines with development teams.
- Led a structured testing process that identified 40+ defects pre-deployment, ensuring the project shipped on schedule without critical quality failures.
- Documented QA processes and outcomes in detailed reports shared with project leads and technical stakeholders after each deployment cycle.

Associate Project Manager for Research and Impact Intern

Jan 2025 – Jan 2026

Tech Executive Labs I.T. Solutions

- Supported planning and execution of 3 concurrent IT/research projects, monitoring milestones and flagging risks to keep deliverables on schedule.
- Conducted research and impact analysis for active projects, producing stakeholder reports with data-driven recommendations.
- Collaborated with 3 cross-functional teams spanning development, design, and research to align priorities and resolve technical blockers within sprint cycles.

PROJECTS

SparStock: Integrated Resource Inventory Management System — Project Lead

- Led a cross-functional team of 4 through full SDLC delivery of a resource inventory platform, completing the project on scope and schedule.
- Developed detailed Agile project timelines and tracked 3 major milestones using sprint planning, retrospectives, and weekly status updates.
- Aligned system design, testing, and documentation to institutional requirements, resulting in successful academic evaluation.

GeoSME: Web-Based Batangas Province SME GIS Mapping System — Project Lead

- Managed full project lifecycle for a GIS mapping system covering 300+ SMEs, coordinating delivery across academic, technical, and government stakeholders.
- Maintained project schedules and task assignments across a 3-person team, ensuring all milestones were met within the academic project timeline.
- Facilitated stakeholder alignment sessions with academic and local government partners, keeping project scope tied to SME digital inclusion goals.

SKILLS

IT & Systems: SDLC Management, System Design & Documentation, QA Testing & Defect Tracking, Database/Records Accuracy, Technical Documentation

Project & Process: Agile/Scrum, Sprint Planning & Execution, Project Planning & Scheduling, Risk Management, Milestone Tracking

Tools & Platforms: Asana, Trello, GitHub, Google Workspace, Microsoft Office, Figma, Canva

Core Strengths: Problem-Solving, Attention to Detail, Cross-functional Collaboration, Stakeholder Communication, Time Management, Leadership

EDUCATION

BS Information Technology – Major in Service Management

Batangas State University TNEU Lipa Campus | Aug 2022 – Jul 2026

GEA CUEVAS

PRODUCTION SERVICES ANALYST

Batangas, Philippines • geamcuevas@gmail.com • +639505046753 • linkedin.com/in/geacuevas/

PROFESSIONAL SUMMARY

IT-trained professional with hands-on experience supporting system quality, monitoring workflows, and resolving issues within structured timelines. Background spans QA coordination for a live application project and project/risk monitoring across concurrent initiatives, with a consistent record of identifying issues early, documenting root causes, and keeping processes running smoothly. Strong foundation in process documentation, incident/defect tracking, and cross-functional coordination, with the technical grounding of a BS Information Technology degree.

EXPERIENCE

Quality Assurance Lead Intern *Feb 2026 – May 2026*
Center for Artificial Intelligence and Smart Technologies - Batangas State University

- Coordinated QA workflows for a live AI application, managing test scheduling, defect prioritization, and resolution timelines with development teams — mirroring production-issue triage and resolution.
- Led a structured testing process that identified 40+ defects pre-deployment, ensuring the system shipped on schedule without critical quality failures.
- Documented QA processes and outcomes in detailed reports shared with project leads and technical stakeholders after each deployment cycle, maintaining a clear audit trail.

Associate Project Manager for Research and Impact Intern *Jan 2025 – Jan 2026*
Tech Executive Labs I.T. Solutions

- Monitored milestones and flagged risks across 3 concurrent projects to keep deliverables on schedule, similar to tracking and escalating production issues before they impact operations.
- Produced data-driven stakeholder reports from research and impact analysis, supporting operational decision-making.
- Coordinated with 3 cross-functional teams spanning development, design, and research to resolve blockers within sprint cycles.

PROJECTS

SparStock: Integrated Resource Inventory Management System — Project Lead

- Led full SDLC delivery of a resource inventory platform, aligning system design, testing, and documentation to institutional requirements.
- Tracked 3 major milestones through structured sprint planning, retrospectives, and weekly status reporting.

GeoSME: Web-Based Batangas Province SME GIS Mapping System — Project Lead

- Managed the full project lifecycle for a data-driven GIS system covering 300+ SMEs, coordinating across technical and stakeholder groups.
- Maintained project schedules and task assignments across a 3-person team, ensuring all milestones and quality checks were met on time.

SKILLS

Systems & Support: Application/System Support, Issue & Defect Tracking, Root Cause Documentation, Testing & Resolution Timelines, Process Monitoring

Quality & Risk: QA Coordination, Risk Identification, Standards Compliance, Process Documentation, Reporting & Audit Trails

Core Strengths: Problem-Solving, Attention to Detail, Cross-functional Collaboration, Time Management, Organizational Skills
